Portfolio

Profiles

Aziz Mehdi
Aziz Mehdi

Skills

DevOps & Cloud

Azure, AWS, GitHub Actions, Docker Compose, EKS, Docker, Kubernetes, CI/CD Pipelines, Jenkins, Ansible, EC2, OpenStack, AKS, Terraform, Nginx

MLOps & AI

MLflow, DVC, FastAPI, Flask, PyTorch, TensorFlow, scikit-learn, Hugging Face, NLP, Transformers

Monitoring & Testing

Prometheus, Grafana, Alertmanager, ELK, Pytest, JUnit, Postman, SonarQube, Trivy

Web & Software Development

Angular, Django, Spring Boot, .Net, REST APIs, Microservices, Bootstrap

Programming & Scripting

Python, Java, C#, C, JavaScript, Shell, Bash, HTML, CSS, TypeScript

Databases

MySQL, PostgreSQL, MongoDB, MariaDB, SQLite

Systems & Environments

Linux(Ubuntu), Windows Server, Git, Agile

Certifications

AWS Cloud Operations
AWS
2025

AWS Cloud Security
AWS
2025

Cisco CCNA Network Security
Cisco Systems
2025

Fundamentals of Deep Learning
Nvidia DLI
2024

Application AI for Predictive Maintenance
Nvidia DLI
2024

Building Transformer-Based Natural Language Processing Applications
Nvidia DLI
2024

Languages

Arabic
Native

French
Professional (B2)

English
Professional (B2)

Spanish
Beginner

Volunteering

DeepFlow
HR Manager
September 2024 - Present

Summary

Final-year Computer Science student at **ESPRIT**, passionate about **Cloud**, **DevOps**, **MLOps**, and **AI**. Skilled in **automation**, **Infrastructure as Code**, and **deploying AI/ML models** or web applications on **scalable and monitored environments**.

Education

ESPRIT — **September 2023 - Present**
Computer Science — Computer Sciences Engineering

Faculty of Science Manar (FST) — **September 2021 - June 2023**
Maths | Physics — Preparatory Cycle

Experience

Verse — **June 2025 - August 2025**
Cloud & DevOps Internship — Lac 2, Tunis

- **CI/CD & Cloud:** Automated pipelines with Jenkins, Docker, GitHub Webhooks for Flutter Web, Flutter APK, and Next.js on AWS EC2, with Blue-Green deployments via Nginx + Certbot.
- **Backups, Monitoring & AI:** Backups of MariaDB (Odoo), and PostgreSQL (Nextcloud) to S3, monitoring with Prometheus/Grafana, integration of Nextcloud, Odoo ERP, and a YOLO AI model, plus provisioning an independent EKS cluster with Terraform.

  Keywords: AWS, Docker, Jenkins, GitHub Webhooks, Terraform, Prometheus, Grafana, MongoDB, MariaDB, PostgreSQL, Odoo, Nextcloud, Flutter, Next.js.

PicoSoft — **August 2024 - September 2024**
Web Development Internship — Technopole, Ariana

- Built a **Django** app for managing equipment and user roles.
- Created a responsive UI using **Bootstrap** and **JavaScript** and Integrated **interactive charts** for real-time data visualization.

  Keywords : Django, Bootstrap, Python, Javascript, Git.

Projects

CallCenterAI – MLOps project — **September 2025 - November 2025**
Github

- **NLP Modeling:** Two approaches — **TF-IDF + SVM** and **multilingual Transformer (BERT)** for automatic ticket classification.
- **MLOps & Automation:** Full pipeline using **DVC**, **MLflow**, and **GitHub Actions** for tracking, versioning, and automated model deployment.
- **AI Agent & Deployment:** Intelligent agent orchestrating models by language and complexity, deployed with **FastAPI**, **Docker**, and monitored through **Prometheus/Grafana**.

Keywords: Python, FastAPI, scikit-learn, Transformers, Docker, DVC, MLflow, Prometheus, Grafana, GitHub Actions.

Shadowhire : AI-Powered Recruitment Platform — **July 2025 - November 2025**
Github

- **Development & Interface:** Designed an intelligent recruitment platform with **Angular** and **Django** for candidate registration, CV upload, dashboards, and application management.
- **AI Microservices:** Built **Flask** services for CV analysis and scoring (**BERT**, **TF-IDF**), job matching, and a **multilingual RAG chatbot**.
- **Deployment & Monitoring: Docker** containerization, **Jenkins + Ansible** automation, **Prometheus/Grafana** monitoring, **MLflow** tracking, and deployment on **Azure**.

Keywords: Angular, Django, Flask, Transformers, PyTorch, TF-IDF, BERT, MySQL, Docker, Jenkins, Ansible, Prometheus, Grafana, MLflow, Azure

PI Cloud-NatureLink — **October 2024 - May 2025**
Github

- **Infrastructure**: Set up **OpenStack** with **Keystone**, **Nova**, **Neutron**, **Octavia**, and **Heat**.
- **Automation & Monitoring**: Automated with **Ansible**, configured **Docker**, **Kubernetes**, and used **Prometheus/Grafana**.
- **Development & Deployment**: Developed a **Spring/Angular** app with **AI models** (NLP, **CNN**, **logistic regression**, **transformers**, **DALL·E**) and **deployed** it.

Keywords: OpenStack, Ansible, Docker, Kubernetes, Prometheus, Grafana, Spring, Angular, AI models.

Blood Donation Platform — **September 2023 - January 2024**
Github

- A desktop application programmed using C and GTK, this is used to manage blood donations and medical staff

Keywords: C, GTK, Desktop application,App development
